Career Summary:

Throughout his career, Stuart has specialised in the agribusiness and horticultural industries, working to develop sustainable management practices with a focus on practical and economical implementation.

Stuart began his career working in pest & disease management across southern Australia. This was mainly in winegrapes, citrus and nut crops, but also crops as diverse as asparagus, flowers & tropical fruits.

Specialising into wine grapes led to the position of Vineyard Manager for Tinlins Wines. Following this, Stuart worked with irrigation management, weather monitoring and disease forecasting Australia-wide for Agrilink.

After a short time as an independent horticultural consultant, Stuart joined Scholefield Robinson in February 2004 as Senior Consultant specialising in horticultural and agribusiness projects.

In mid-2007, Stuart relocated to Europe and is currently working as an independent consultant based in Sweden. Agribusiness, Horticultural and Viticultural Production, IPM, Irrigation Management & Water Resources remain his primary areas of interest.

Projects & Services:

- Agribusiness project reviews and due diligence reporting
- Independent reports and advice to investors
- Business development, market development and budget analysis
- Consulting in agribusiness, horticultural production & water management
- Property assessments and technical advice
- Government projects on agribusiness, water resources & bio-security
- Member of multi-disciplinary teams & projects
- Communication, negotiation and consultation skills
- Clients include private producers, government agencies and investors
